

Unfortunately, I and my family are out of the country. I hope some one can read this aloud.

I am overwhelmed by the latest turn this farce has taken. Up until now, I have held back from talking about the inhumane aspects of former deer killing plans. I have focused instead on the dangers of firing guns in our small community.

But this current plan is so ghastly, I have even refrained from telling my 13 yr. Old daughter about it because of the effect I know it would have on her. Net and bolt is a horrifying methodology condemned the world round and illegal in our state. Why is Mayor Supron SO focused on this deer killing issue? Why will the board work for years to protect a few Hostas, coming up with such outlandish plans that the media has made our small, and normally, wise community into a laughingstock and a media circus? Anyway, I'd much prefer that our roads be fixed, that our school children be made more safe going to and from school and that our water supply be brought up to modern standards than waste any more time on these dangerous and shockingly inhumane plans made by a handful of people behind closed doors.

Our community is made up of intelligent people who care about one another. If we were brought together in a forum where we could really talk amongst ourselves in small groups instead of being given a few seconds to spout our position, we could hear each other and solve this problem, Put this issue into the hands of the community where it belongs.
