Dear Mayor Supron,

For the life of me I cannot understand why you would go along with the terrifying and inhumane netting of wild deer, continuing on to their painful death by captive-bolt, in the hands of nervous and inaccurate shooters.

If it were puppies or kittens digging in someones garden you wouldn't even consider putting them through this gruesome killing scheme. I'm sure of it.

So why the deer?

Everyone knows that deer can be excluded by appropriate, next-to-invisible, fencing. This is also a permanent solution, if maintained over the years.

Please be the hero here, and work toward a humane arrangement between residents and the natural residents, the deer. Thanks for your time - Shelly Schlueter
